People 

Simplify HR Processes

A comprehensive solution for all HR needs, designed specifically for small and medium businesses. From onboarding to offboarding, recruitment to exit management, it streamlines complete HR processes.

Looking to transform your HR?

Stop managing people, and start empowering them. It is the only HR software that works as hard as your employees.

Dashboard

A centralized hub offering quick access to payslip generation, timesheets, contract status, and real-time check-in/check-out status, alongside personalized user information.

Employee Onboarding

Streamlined onboarding workflows with customizable templates based on department or employee hierarchy.

Recruitment

A built-in ATS that enables posting job openings, defining recruitment stages, tracking candidate progress, and leveraging HR reports.

Payroll

Automated payroll processing with advanced payslip generation and seamless integration with leave and timesheet data for accurate salary computations.

Attendance & Leave Management

Supports multiple attendance methods, implying the inclusion of geo-fencing via mobile app—so employees' check-ins/out are verified by location. (Not explicitly stated as "geo-fencing," but strongly implied).

Appraisal Management

It conduct performance reviews, deliver timely feedback, and promote transparent appraisal procedures to boost employee motivation.

Disciplinary Tracking

Tools to log and manage violations, collect employee explanations, and enforce actions in line with company policy.

HR Announcement

A communication module for broadcasting internal announcements with the ability to attach relevant documents.

Expense Management

Simplified workflows for submitting and approving expense reports, including business trip and purchase reimbursements.

Asset Management

Facilities to assign, monitor, and track company assets (e.g., hardware or software licenses), complete with email notifications for overdue returns.

dravya-o

MATERIALS - MANAGED - MASTERED

Master Your Materials with Intelligent Inventory Intelligence

Dravya-o transforms inventory chaos into operational excellence. This comprehensive platform provides end-to-end visibility and control over your materials, from procurement to consumption, ensuring optimal stock levels while minimizing waste and maximizing efficiency.

FROM WAREHOUSE TO WORKSPACE, TOTAL CONTROL

Predictive Analytics Engine

Advanced machine learning algorithms analyze consumption patterns, seasonal trends, and market conditions to predict material needs

Intelligent Reorder Automation

Smart reorder points that adapt based on lead times, demand variability, and supplier performance.

IoT Integration Ready

Seamlessly connects with RFID tags, barcode scanners, and IoT sensors for real-time inventory tracking and updates.

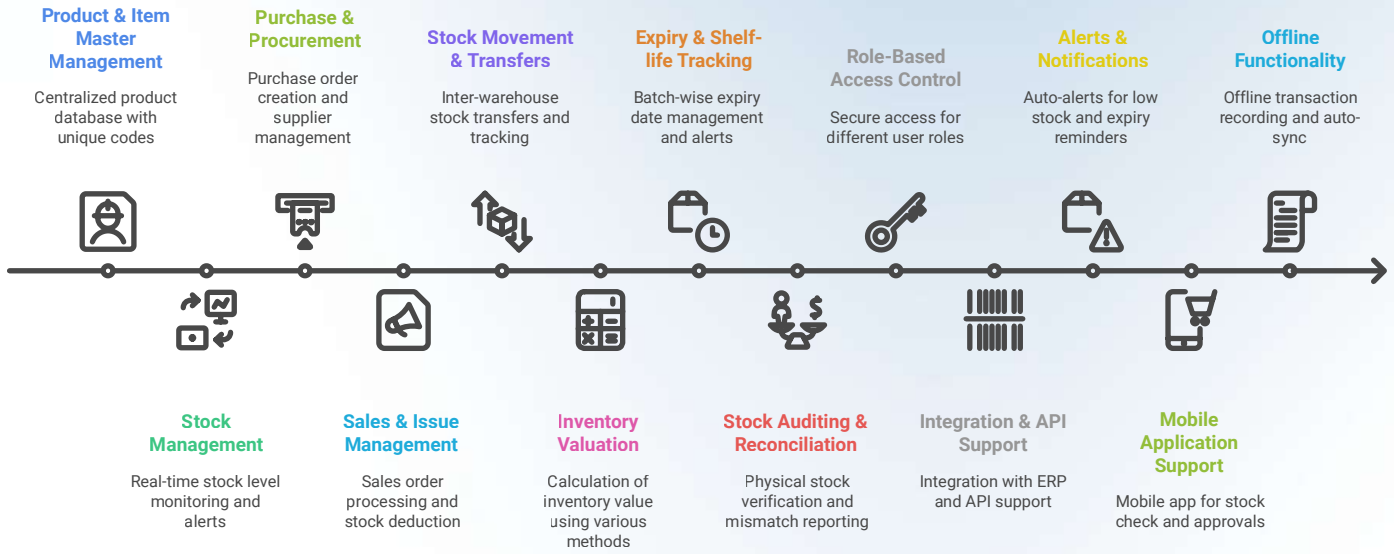

Total Cost Optimization

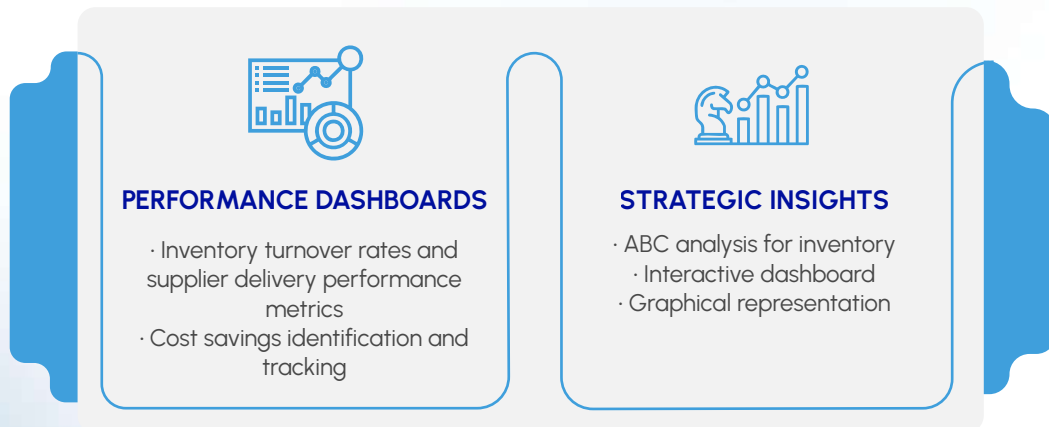

Comprehensive cost analysis including carrying costs, ordering costs, and opportunity costs.

1. Selfie-based attendance marking with real-time facial capture.
2. Geo-tagging & time-stamp to ensure authenticity of attendance location.

Performance Analytics

1. Individual and team performance dashboards.
2. Revenue forecasting with confidence intervals.

Movement & Travel Tracking

1. Live GPS tracking of sales person's movement during office hours.
2. System records: Start & end location of the journey, Travel duration, Distance covered (km) using GPS logs.

Travel Expense Reimbursement

1. Automatic calculation of distance traveled per day.
2. Integration with company's expense policy to auto-calculate eligible travel.

Key Spotlight Highlights

Smart Notifications:

Alerts that surface critical opportunities and risks at the perfect moment, ensuring no deal falls through the cracks.

Multi-Role Access

Different access levels for: Salesperson, Team Leader / Supervisor, Admin / HR / Finance (for approval & payroll integration).

Offline Functionality:

DSR filling & attendance marking available offline.

Auto-sync when internet connectivity is restored.

Training & Support

- Comprehensive onboarding program with dedicated success manager
- 24/7 technical support with outstanding response time

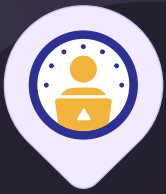

Proven Impact Metrics

- Average 35% increase in conversion rates within 90 days
- 60% reduction in sales cycle duration

Enterprise-Grade Security

- End-to-end encryption for all data transmissions
- GDPR and CCPA compliance built-in

INO-O

VALUE YOUR TIME

Say Goodbye to Tedious Attendance Tracking

INO-O is an intuitive mobile app that simplifies attendance management. With geofencing technology, a user-friendly interface, & robust reporting features, and a budget-friendly price point, it empowers organizations to improve efficiency and gain valuable workforce insights.

Key Features

Geofence Attendance

Automatically track attendance when users enter or leave predefined geofenced areas (e.g., offices, schools, worksites). Real-time location verification ensures attendance accuracy, with notifications for successful check-ins & check-outs.

Advanced Security Features

Anti-spoofing technology prevents fraud, while multimodal biometrics enhance security. Our facial recognition with AI offers anti-spoofing features and achieves an error rate as low as 0.001%.

Integration with Payroll Systems

Easily integrates with existing payroll software, ensuring seamless operations and accurate salary calculation.

Push Notifications

Receive real-time alerts for attendance status, geofence movements, and report availability, and notify them of attendance discrepancies or missed punches.

Data Privacy & Security

The system ensures user privacy and data security by complying with industry standards.

Secure Storage

All data is encrypted in transit (SSL/TLS) and at rest (AES256).

Minimal Data Collection

We collect only essential information, including geolocation (with user consent) and attendance timestamps.

Profile Data

Users have complete control over their personal data, with options to view, edit, or delete their information.

Access Control

Sensitive data is accessible only to authorized personnel.

Intelligent Attendance

Automated attendance with AI-powered face recognition, offering a teacher-led group photo option and a student self-attendance fallback within classroom-specific geofenced zones.

Seamless Offline Operation

Our app operates seamlessly without an internet connection, ensuring data loss prevention in offline areas through the use of anti-spoofing technology.

Ongoing Support & Maintenance

We deliver security patches and updates for user data protection while providing ongoing support and maintenance to ensure seamless system operation.

Invest in a Futuristic Smarter Workforce

Choose INO-O for smarter, more streamlined and better workforce management experience

With additional features like holiday mapping, AI-powered face recognition with liveness detection, and industry-leading accuracy rates (FRR & FAR of 0.001%), INO-O delivers unparalleled reliability and peace of mind.

Task

Task-O is an all-in-one project management solution built for modern organizations aiming for efficiency and clarity in their operations. It unites planning, tracking, resource allocation, communication, and analytics in a seamless hub, simplifying complex projects and making teamwork effortless.

Key Features

Project Planning

Create detailed project plans with schedules, dependencies, milestones, and resource allocation, laying a strong foundation for successful execution.

Risk Management

Proactive risk assessment and resilient management, minimizing disruptions and maximizing project continuity.

Progress Tracking

Visual dashboards, Gantt charts, and milestones keep teams informed and projects on target.

Budgeting & Cost Management

Estimate budgets, track expenditure, and ensure projects stay financially on track.

Task Management

Organize, assign, and prioritize tasks with real-time updates and progress tracking, ensuring deadlines are met and workloads optimized.

Collaboration

Integrated team communication including chat, file sharing, and instant messaging, enhancing transparency and building synergy.

Resource Allocation

Assign people and materials efficiently, balancing workloads for optimal productivity.

Reporting & Analytics

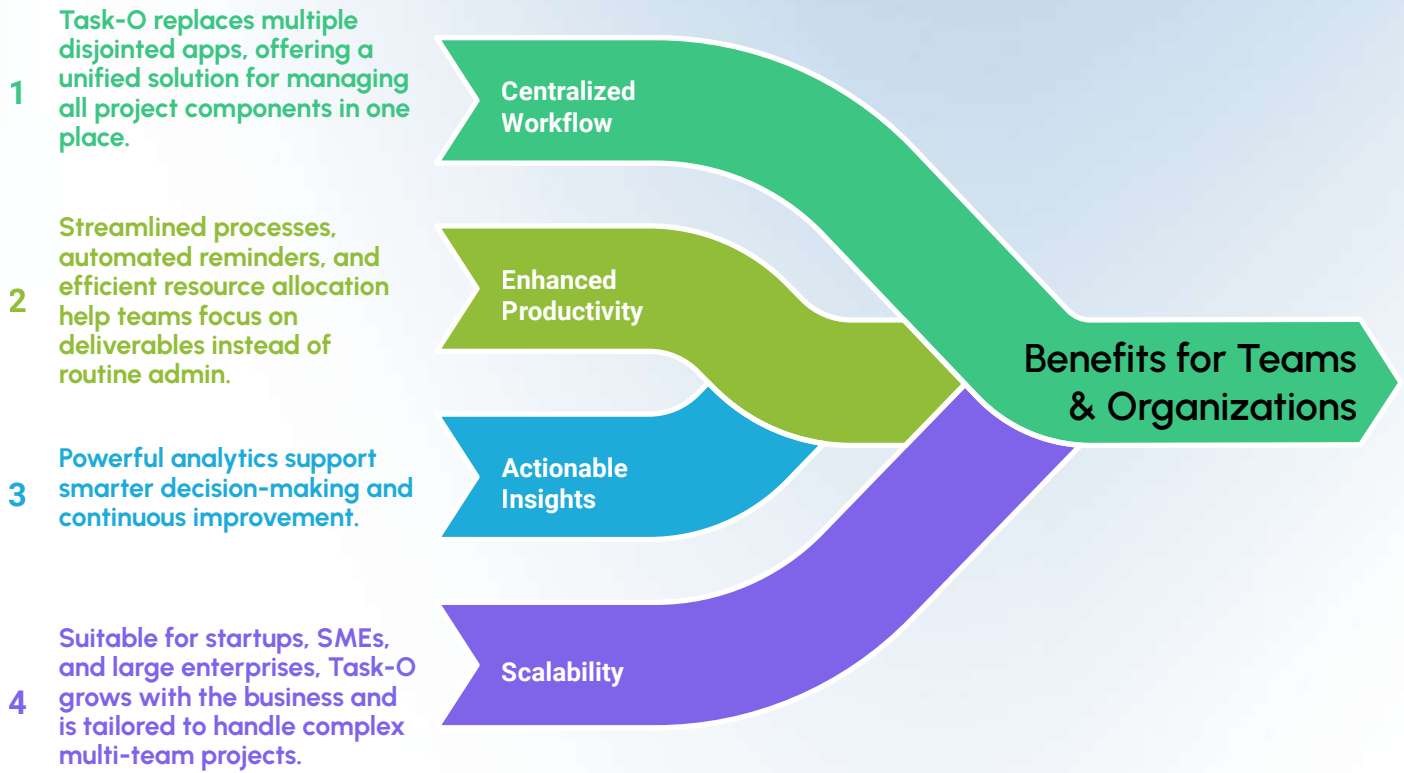

Generate in-depth reports, project summaries, and actionable insights to refine future strategies.

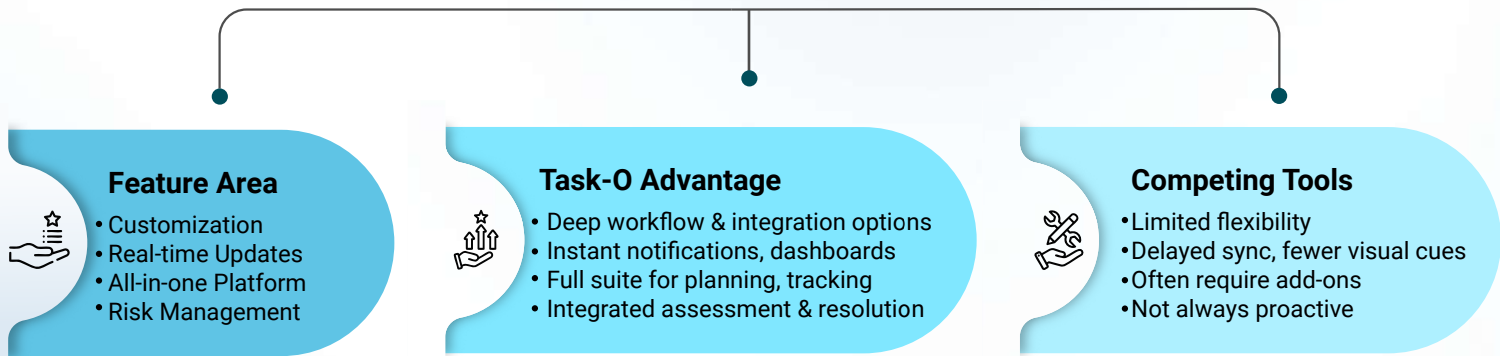

Integration & Customization

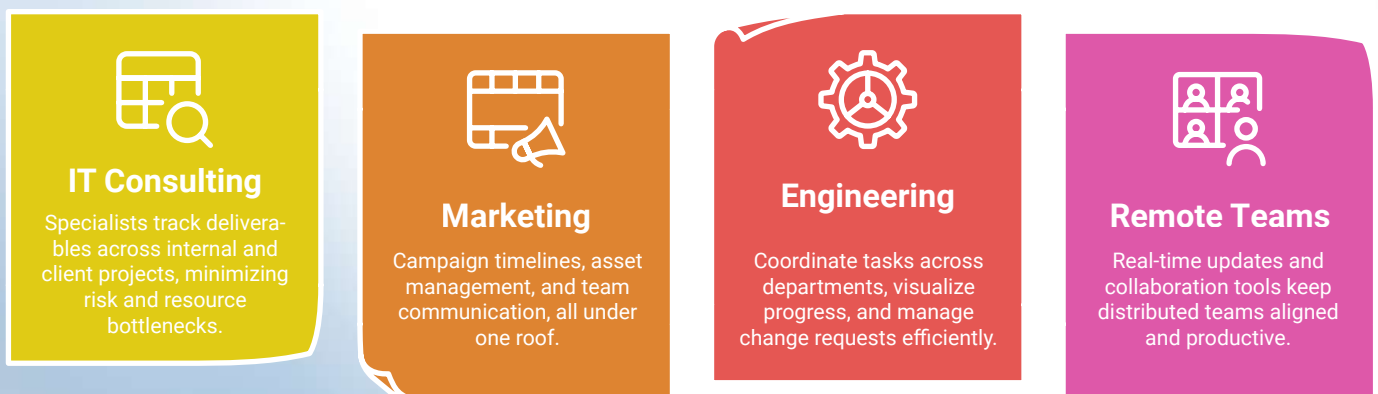

Easily integrates with popular tools and platforms, adaptable to varied workflows and unique client needs.

How Task-O Stands Out

Use Cases

Why Choose Task-O?

Task-O is more than software—it's a digital partner that empowers organizations to execute projects with confidence, agility, and strategic foresight. It is customizable for every business scenario, ensuring each project is set up for success.

MeetaTime

Board Management System

MeetaTime offers a comprehensive suite of tools to ensure your meetings are efficient, well-organized, and productive. It is designed to streamline appointment booking, meeting scheduling, and document management.

Why Choose MeetaTime??

We understand the challenges of managing board meetings. That's why we've designed MeetaTime to be the ultimate solution for your board management needs. With our intuitive interface and robust feature set, you'll save time, reduce administrative overhead, and ensure your meetings are more effective than ever.

Meeting Details

Discussion Points

Document Management

Schedule Meetings

Events Of Meetings

Analytics And Reporting

Features Overview

Discussion Points

Use our dedicated section for noting and tracking key discussion points. This ensures all important topics are addressed and followed up on in future meetings.

Events of Meetings

Display events in a calendar format for easy tracking. The visual calendar helps board members quickly see all scheduled meetings and related events at a glance.

Document Management

Upload and share important documents related to meetings, such as reports, presentations, and minutes. Keep all your essential documents organized and accessible.

Collaboration Tools

Engage in real-time collaboration with features that include comments and discussions on agenda items and documents. Enhance communication and ensure everyone is on the same page.

Analytics and Reporting

Generate comprehensive reports and analytics to review meeting outcomes and board performance. Use these insights to improve future meetings and board efficiency.

Dashboard

Get a clear, visual overview of your upcoming board meeting schedule. Our easy-to-read graphics help you stay informed about future meetings briefly.

Add User

Easily add agenda items for meetings through a user-friendly form. This streamlines the process of setting up meeting topics and discussions, ensuring nothing important is overlooked.

Meetings

Access all relevant information regarding your board meetings in one place. From meeting times and locations to detailed agendas, ensure all participants have the information they need.

Schedule Meetings

Schedule new meetings with ease. Coordinate times that work best for all board members, reducing scheduling conflicts and ensuring full attendance.

Elevate Vendor Relations from Transactional to Transformational

VIMS-O is more than procurement software – it's a strategic partnership platform that transforms how you identify, evaluate, engage, and optimize relationships with suppliers. Built for organizations that understand vendors as strategic assets, not just cost centers.

Simplify every partnership, strengthen your supply chain:

360-Degree Vendor Intelligence

Comprehensive vendor profiling that combines financial health, performance metrics, and market intelligence

AI-Powered Vendor Discovery

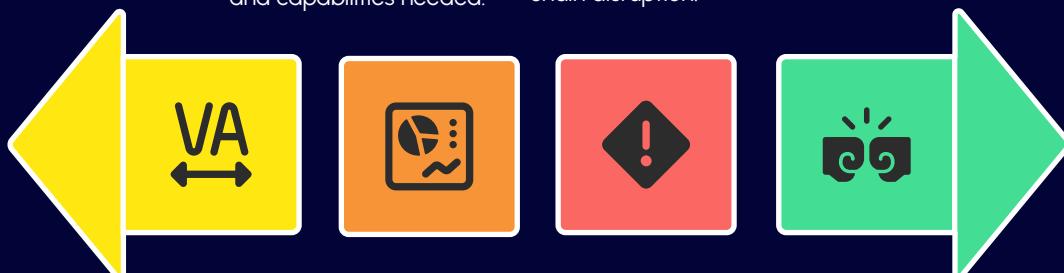

Intelligent matching system that identifies vendors based on your requirements and capabilities needed.

Dynamic Risk Management

Risk monitoring including financial indicators, news sentiment analysis, and supply chain disruption.

Collaborative Performance Optimization

Shared dashboards and scorecards that foster transparent communication and joint improvement

Core Accounts Payable Automation

Vendor Management

Streamlines vendor registration & management, document storage, and blacklisting/whitelisting for secure and organized vendor data.

Invoice Submission & Capture

Automates invoice intake through multiple channels, using OCR for data extraction, validating formats, and supporting bulk uploads.

Purchase Order (PO) Matching

Ensures accuracy with automated 2-way and 3-way matching, partial PO support, and flagging mismatches for review.

Workflow Automation

Creates configurable, role-based approval workflows with auto-routing and escalation rules to speed up the approval process.

Financial & Technical Capabilities

Compliance & Validation

Ensures financial accuracy and compliance with automated GST validation, duplicate invoice detection, and TDS calculation.

Payment Processing

Manages and automates payments through various modes, integrating with accounting systems and generating payment advice.

Tracking & Status Updates

Provides real-time visibility into invoice status with notifications and alerts for vendors and internal teams.

Reporting & Analytics

Offers comprehensive reports for invoice aging, vendor payments, tax summaries, and spend analysis to provide actionable insights.

Integration

Connects with critical business systems like ERPs, accounting software, and bank APIs for seamless data flow and process automation.

Security & Accessibility

Document Management

Ensures secure storage, version control, and easy retrieval of all key financial documents (invoices, POs, GRNs).

Security & Audit

Protects sensitive data with role-based access control, digital signatures, complete audit logs, and data encryption.

Mobile Access (Optional)

Provides mobile accessibility for approvers, enabling on-the-go invoice review and approval via a dedicated app with push notifications.
